

K-SOL SA20 BIANCO

PROMOTES PLANT GROWTH FOR ALKALINE SOILS

K-SOL SA20 White is the nitrogen fertilizer of the K-SOL LINE, based on high-purity ammonium sulfate, light in color and highly soluble.

CROP	TIME OF APPLICATION	DOSE/HECTARE*
All crops	Vegetative phase	25-50 kg

COMPOSITION	
Total nitrogen (N)	20.60%
Ammoniacal nitrogen (N)	20.60%
Sulfuric anhydride (SO ₃) soluble in water	58%

PHYSICO-CHEMICAL FEATURES	
SOLUBLE POWDER	
pH (sol 1%)	6.5
Conductivity E.C. µS/cm (1‰)	2140
METHOD OF USE	
	Fertigation

PACKAGING: 25 KG - PALLET 1500 KG

The choice of the dose is subordinated to various factors and can be varied when necessary. All applications can be repeated in relation to the different crop needs. You can contact our Technical Service for the correct application on specific soils and under specific climate conditions.
